Experiment 9: CI/CD Deployment with GitHub Actions, Render & Vercel

Aim: Configure continuous automated linting, building, Docker smoke tests, and zero-downtime deployment on every Git push.

Tech Stack / Concepts: GitHub Actions, CI/CD Pipeline, Automated Builds, Vercel Serverless, Render PaaS

Repository: github.com/JaideepGowda2006/Certified | Student: Jaideep Gowda

Screen 1: Live GitHub Actions Automated Pipeline History

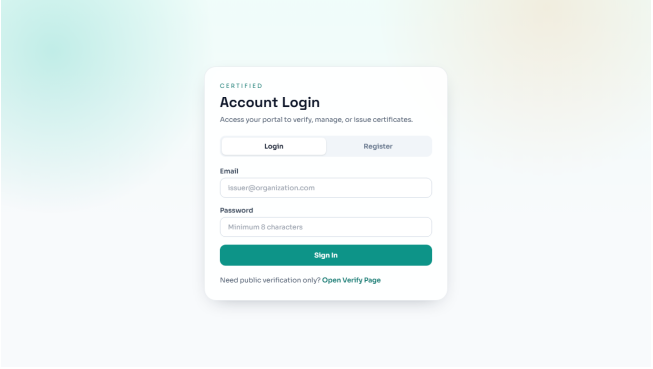

Sequential green checkmarks demonstrating passing builds, audits, and tests.

Screen 2: GitHub Actions CI/CD Workflow Definition (.github/ci.yml)

Automated workflow triggers: checkout, Node 20 setup, Vite build, Docker check.

Screen 3: Production Vercel Deployment Live Verification

Automated zero-downtime deployment hosting compiled static bundle on edge CDN.
